

Everett White, Ph.D.

1401 Red Hawk Circle, #G-301, Fremont, CA 94538
Phone: 510-794-1552 email: Everett@cwnet.com

EDUCATION

Ph.D. Course Work, Accounting & Finance, Tulane University, 1990-1991
Ph.D., Economics, Virginia Polytechnic Institute & State University, 1979
M.A., Political Science, Virginia Polytechnic Institute & State University, 1974
B.A., Political Science, Virginia Polytechnic Institute & State University, 1969

PROFESSIONAL EXPERIENCE

1999 – present **New United Motor Manufacturing, Inc. (NUMMI)**
Fremont, CA

Senior Specialist – Production Control

NUMMI, a joint venture of Toyota Motor Manufacturing and General Motors, produces the Toyota Corolla, Chevrolet Prizm, and Toyota Tacoma.

Responsibilities include monitoring suppliers' production and delivery of parts to NUMMI, crisis management, and management of special projects.

Regular Responsibilities: Assuring that suppliers ship to order all parts, and that these will arrive at NUMMI on time to support "Just In Time" inventory requirements.

Crisis Management: Working with suppliers to manage any actual or potential disruptions in delivery of parts. Examples include natural disasters, transportation issues, and inadequate performance by suppliers.

Special Projects Management:

Coordinator for North American parts management for start of production of new model-year vehicles (SOP Coordinator). Responsible for making sure all North American parts suppliers are prepared to produce and ship new model parts for safety stock inventory and to meet daily orders at the start of production of the new model vehicles. Includes managing Parts Ordering Specialists who monitor shipment and delivery of parts, making sure suppliers meet their responsibilities and NUMMI's expectations, determining quantities to be ordered for safety stock, and verifying parts availability for the start of production of new model vehicles. Includes management of large databases.

Coordinator for engineering changes for North American parts suppliers (ECI Coordinator). Responsible for monitoring the introduction of new parts due to engineering changes which occur during current model-year production. Includes management of Parts Ordering Specialists whose suppliers have parts changes to ensure the smooth introduction of new parts into the production process.

1996-1999 **Computer Experience** **Modesto, CA**

Proprietor

Owner and operator of a business specializing in building custom computer systems for home and business use, upgrading computer systems, web-site production, and individual training in business software applications.
